The following pages outline the performance measures for the OJJDP Tribal Youth Programs (TYP). These pages show the performance measures and the data that the grantee must provide to calculate the performance measures. The calculations on the grid are performed automatically by the DCTAT with the values that are entered. Examples of calculated values include percentages, total amounts, and averages.

The performance measures are presented as outputs or outcomes. Output measures are the products of a program’s implementation or activities and are usually counts of things, such as amount of service delivered; staff hired; systems developed; sessions conducted; materials developed; or policies, procedures, and/or legislation created. Outcome measures are the benefits or changes observed or realized through the outputs and may include program completion, behavior, attitudes, skills, knowledge, values, conditions, or other attributes.

Grantees are required to provide data for the indicators in the column labeled “data the grantee reports.”

The TYP performance measures are reported in two formats: numeric data, and narrative questions that require written responses. Both formats are entered in the OJJDP Data Collection and Technical Assistance Tool (DCTAT) semiannually.

The activities funded by TYP are organized into 6 program categories: planning year, prevention services, interventions for court-involved tribal youth, tribal juvenile justice system, alcohol and drug abuse prevention programs, and mental health program services. The grantee is asked to select the program categories that correspond to the activities approved in each OJJDP application. The system then generates performance measures for each respective category. The grid that follows is divided into the 6 program categories and the corresponding measures for each.

In addition to entering data in the DCTAT, the grantee is responsible for creating a Performance Data Report from the DCTAT in January and July of each calendar year. Each grantee then submits this report to OJJDP through the Grants Management System (GMS).

If you have any questions about the DCTAT or performance measures, please call the OJJDP-DCTAT Help Desk at 1-866-487-0512, or send an e-mail to: ojjdp-dctat@csrincorporated.com

For questions about TYP grant programs, please contact your OJJDP Program Manager, who can be found at: http://www.ojjdp.gov/statecontacts/resourcelist.asp

Any changes made to the Performance Measures Grid will be noted in bold blue lettering and dated.
The following target behavior measures focus on short- and long-term behavioral outcomes for youth who received services specified below. Choose all target behaviors that apply to your program services. **These measures will only appear for the following program categories:**

- Prevention Services (TYP I)
- Interventions for Court-Involved Tribal Youth (TYP II)
- Alcohol and Drug Abuse Prevention Programs (TYP IV)
- Mental Health Program Services (TYP V)

| 3 | Number and percent of program youth who re-offend during the reporting period (short term) | The number and percent of participating program youth who were arrested or seen at a juvenile court for a new delinquent offense during the reporting period. Official records (police, juvenile court) are the preferred data source. The number of youth tracked should reflect the number of program youth that are followed or monitored for new arrests or offenses. Ideally this number should be all youth served by the program during this reporting period. Ex. If I am serving 100 youth in my program, A would be 100. If I am following up with 50 of them, B would be 50. Of these 50 program youth I’m tracking, if 25 of them were arrested or had a delinquent offense during this reporting period, then C would be 25. | A. Total number of program youth served  
B. Number of program youth tracked during this reporting period  
C. Of B, the number of program youth who had a new arrest or delinquent offense during this reporting period  
D. Number of program youth who were recommitted to a juvenile facility during this reporting period  
E. Number of program youth who were sentenced to adult prison during this reporting period  
F. Number of youth who received another sentence during this reporting period  
G. Percent recidivism (C/B) |

| 6  | Number and percent of program youth who offend during the reporting period (long term) | The number and percent of participating program youth who were arrested or seen at a juvenile court for a delinquent offense during the reporting period. Official records (police, juvenile court) are the preferred data source. The number of youth tracked should reflect the number of program youth that are followed or monitored for arrests or offenses 6-12 months after exiting the program. | A. Number of program youth who exited the program 6-12 months ago that you are tracking  
B. Of A, the number of program youth who had an arrest or delinquent offense during this reporting period  
C. Number of program youth who were recommitted to a juvenile facility during this reporting period  
D. Number of program youth who were sentenced to adult prison during this reporting period  
E. Number of youth who received another sentence during this reporting period  
F. Percent of Long Term offending (B/A) | Here |
| 7  | Number and percent of program youth who are victimized (short term)           | The number and percent of youth who were victimized during the reporting period.                                                                                                                                                              | A. Total number of program youth served  
B. Number of program youth tracked during this reporting period for victimization  
C. Of B, the number of program youth who were victimized  
D. Percent victimized (C/B) | |
| 7  | Number and percent of program youth who are victimized (long term)           | The number and percent of youth who exited the program 6-12 months ago and were victimized during the reporting period.                                                                                                                                 | A. Number of program youth who exited the program 6-12 months ago that you are tracking for victimization  
B. Of A, the number of program youth who were victimized during this reporting period  
C. Percent of Long Term victimization (B/A) | |

Ex. I have a lot of youth who exited my program 6-12 months ago, but we are only tracking 100 of them, so A is 100. Of these 100 program youth that exited the program 6-12 months ago 65 had a new arrest or delinquent offense during this reporting period, so B is 65.

| 3  | Number and percentage of program youth who relapse during the reporting period (short term) | Not available at this time.                                                                                                                                                                                | A. Number of program youth who relapse during the reporting period  
B. Number of youth in program  
C. A/B |                  |                  |
| 4  | Number and percent of program youth who **offend** during the reporting period (short term)  
*Added 12/01/2010* | The number and percent of participating program youth who were arrested or seen at a juvenile court for a delinquent offense during the reporting period. Appropriate for any youth-serving program. Official records (police, juvenile court) are the preferred data source.  
Ex. If I am serving 100 youth in my program, A would be 100. If I am following up with 50 of them, B would be 50. Of these 50 program youth I’m tracking, if 25 of them were arrested or had a delinquent offense during this reporting period, then C would be 25. | A. Total number of program youth served  
B. Number of program youth tracked during this reporting period  
C. Of B, number of program youth who had an arrest or delinquent offense during this reporting period  
D. Number of program youth who were recommitted to a juvenile facility during this reporting period  
E. Number of program youth who were sentenced to adult prison during this reporting period  
F. Number of youth who received another sentence during this reporting period  
G. Percent offending (C/B) |                  |
| 4  | Number and percent of program youth who **offend** during the reporting period (long term)  
*Added 12/01/2010* | The number and percent of participating program youth who were arrested or seen at a juvenile court for a delinquent offense during the reporting period. Appropriate for any youth-serving program. Official records (police, juvenile court) are the preferred data source.  
Ex. I have a lot of youth who exited my program 6-12 months ago, but we are only tracking 100 of them, so A is 100. Of these 100 program youth that exited the program 6-12 months ago 65 had a new arrest or delinquent offense during this reporting period, so B is 65. | A. Number of program youth who exited the program 6-12 months ago that you are tracking  
B. Of A, the number of program youth who had an arrest or delinquent offense during this reporting period  
C. Number of program youth who were recommitted to a juvenile facility during this reporting period  
D. Number of program youth who were sentenced to adult prison during this reporting period  
E. Number of youth who received another sentence during this reporting period  
F. Percent of Long Term offending (B/A) |                  |
